

## CodeRed Emergency Notification System

The Town of Weymouth in conjunction with the Norfolk County Sheriff's Department is pleased to introduce the CodeRed Emergency Notification System for reverse 911 communication to the residents of the Town of Weymouth.

The CodeRED Emergency Notification System is a high volume, high speed communication service available for mass emergency notifications. CodeRED employs a one-of-a-kind Internet mapping capability for geographic targeting of calls, coupled with a high speed telephone calling system capable of delivering customized pre-recorded emergency messages directly to homes and businesses.

The Norfolk County Sheriff's Office in concert with the Town of Weymouth is providing an emergency notification system to the residents of the Town. This system allows for telephone messages to be sent to targeted areas of Norfolk County or the Town of Weymouth within minutes. It then delivers a pre-recorded message describing the situation to a live person or an answering machine in the affected area, including instructions requiring immediate action on the part of the recipient if necessary.

While a calling data base was created by extracting information from the Town's computerized files and other public record sources, it is certain that not all phone numbers of residents and residential and business property owners within our incorporated limits were captured.

If you reside or own property within the limits of Norfolk County and would like to receive CodeRED emergency messages you may sign up for this service by clicking the

link on the Town of Weymouth home page or Weymouth Police web page.

**IMPORTANT: WHEN SIGNING UP FOR NOTIFICATIONS MAKE CERTAIN YOU USE YOUR PHYSICAL ADDRESS WITHIN NORFOLK COUNTY. DO NOT USE POST OFFICE BOXES OR ADDRESSES OUTSIDE OF NORFOLK COUNTY LIMITS.**
