The following is a list of completed 2016 road paving related projects. There is also approximately 1.8 million in additional roadway improvement work still to be initiated this year. The 1.8 million in projects will be finalized within the next week.

Additionally, we have purchased a sidewalk paver for use by in-house staff to undertake additional sidewalk work.

We are working on putting in place a process to have unaccepted private ways accepted as public ways. This will require some cooperation from residents of said private ways of which there are more than 300 in town. Affected residents will be notified hopefully by the end of the year. This is an issue that has been put on the back burner or avoided for a long time and we are trying to fix.

State law does not allow us to use Ch 90 road funding for unaccepted private ways.
