George & Oatmeal Save Santa

Commander Randall T. Boyd Jr. Planetarium
Weymouth's Community Planetarium

Wednesday, December 9, 2015 – 6:30 p.m.
Saturday, December 12, 2015 – 2:00 p.m.
A family program designed for children in grades PreK-3 and the child in all of us.

Santa Claus is missing! Mrs. Claus is worried and asks Oatmeal the snowman to help find him. Join Oatmeal and his friend, George, the planetarium wizard, as they travel the world in search of Santa. Along the way they are told constellation stories from many cultures and how to use the stars of the Big Dipper to find north. This show is particularly appropriate for young children and their families. We will also see what's up in Weymouth's December sky and observe the sky from the North Pole.

No matter what the weather is outside, the stars always shine in Weymouth's community planetarium.

The Commander Randall T. Boyd Jr. Planetarium is located at Weymouth High School, One Wildcat Way, South Weymouth, MA 02190
Enter through the Gold Building's main door located under the silver arches by the flag pole.

Seating is limited to 67 individuals per event, so your registration is important. You cannot be admitted without being registered. Seating is determined on a first come, first served basis.
