MEMO 1163 Main Street, Weymouth

To: Mary Ellen Schloss, Shawn Hardy

From: Ken Thomson

Changes to rain garden design:

- As suggested increased the size of swamp dogwood and arrow-wood to 3-4 feet and this is not required for the alders.
- Removed the continuous mulch layer and will stabilize the area with New England Plants, Inc. Wetmix.
- Added 2 foot of mulch or coco fiber tree rings around shrubs to minimize competition and shading from the seed mix on the slower growing shrubs.
- Revised drawing dated 6/23/2021
