

ADOPT A GREEN BEAUTIFICATION PROGRAM

Councilors Michael Molisse and Thomas J. Lacey have instituted an ADOPT-A-GREEN BEAUTIFICATION PROGRAM for the Town of Weymouth. Green maintenance commences on May 1st of each year and continues until the first frost in October. Responsibilities of green maintenance include mowing the grass, weeding, planting, flowerbeds, watering, raking and general maintenance of the designated island areas throughout the town.

Individuals generous enough to volunteer for this program will be provided with a sign that is installed by the Department of Public Works that recognizes their efforts. The sponsor of the adopted island can choose to put their own name on the sign or choose the name of a beloved person they may have lost.

All interested parties are encouraged to contact the Town Council Office at (781) 340-5020 for further details on both the program and green availability.
